WHAT IS MULLAN?

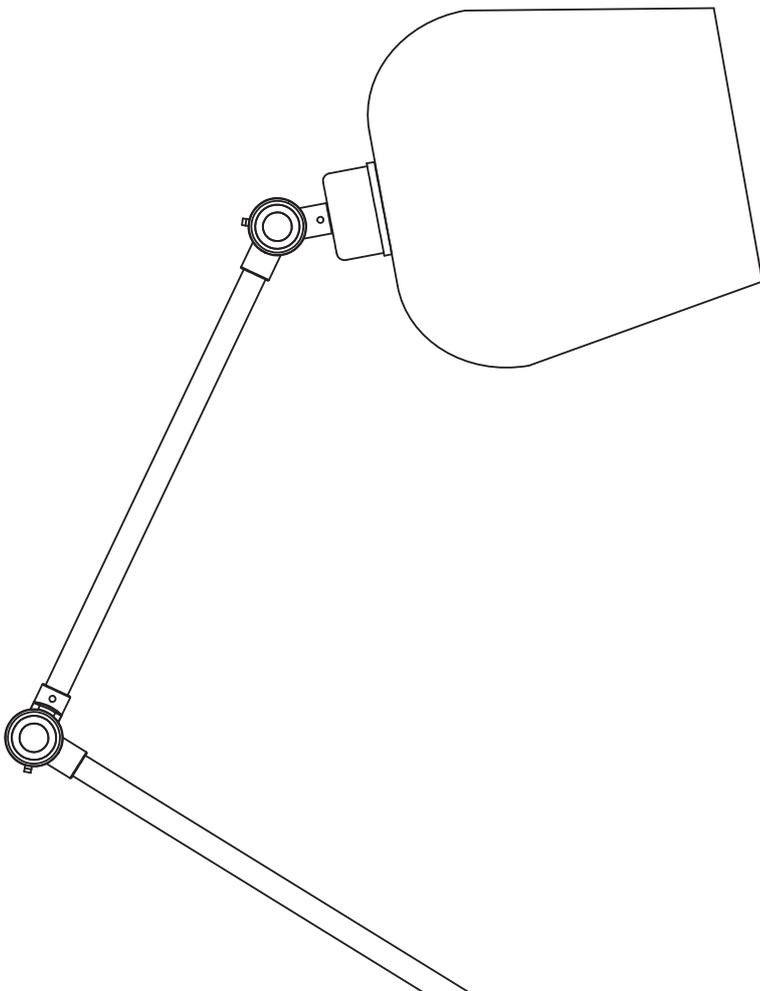

Nestled in the lush heartlands of Ireland, north of Monaghan town through Emyvale, lies Mullan Village. The name "Mullan" comes from the Irish word "an muileann", meaning "the mill".

Established in the 1840's, Mullan has always been a hive of creativity and craftsmanship. Over the years, the mill has served various purposes, from a flax mill to a boot factory, and now it houses Mullan Lighting. Today, Mullan continues its legacy of craftsmanship, producing bespoke and tailored light fixtures, symbolising quality, durability, and good value.

DIRECTORS, MIKE AND EDEL TREANOR

WHY LIGHTING?

Lighting shapes our environments and influences our mood, productivity, and overall well-being.

Founded in 2009 by Mike Treanor, our mission has been to craft high-quality, durable lights that are both functional and aesthetically pleasing. Together, Mike and his wife Edel have driven our commitment to excellence, innovation, and unique design. We pride ourselves on exceptional customer service and clear communication, ensuring our clients receive the best lighting solutions.

Lighting is more than just illumination; it's about creating spaces that inspire and comfort.

A flax mill, with its associated mill race and workers' cottages, is developed on the site in Mullan village. The mill remained operational until the early 20th century.

c1850

The shoe factory closes. The nearby border road also closes due to The Troubles in Northern Ireland. The factory would lie idle for the next 30 years. By 1990 most of the mill cottages are abandoned and the village is all but deserted.

1978

Mullan Lighting expands its product range from traditional pub and church lighting to vintage and industrial-style lighting. The company begins to export to the United Kingdom.

2012

1922

A shoe factory is established in the old mill and Mullan Village is once again a bustling rural center. The factory employed over 80 people at its height and manufactured the Mill Brand and the Border Brand footwear.

2009

Mullan Lighting is established by Mike Treanor inside the old mill building. At the same time the mill houses in the village are faithfully restored and life is brought back to Mullan once more.

2013

Mullan Lighting attends its first international trade show, MAISON&OBJET, in Paris. Subsequent trade shows in Germany, Stockholm and the United Kingdom help establish the Mullan Lighting brand across Europe.

Mullan Lighting's product quality and speed of manufacture becomes recognised more and more. We become the choice lighting supplier for Costa Coffee, Hilton Hotels, the Hard Rock Cafe and Superdry retail stores.

2015

Mullan Lighting completes the manufacture of dozens of bespoke light fixtures for the iconic Café en Seine in Dublin, Ireland. We continue to invest in product development and to expand our range of decorative light fixtures.

2018

The Mullan Ceramics brand is launched. Our range of ceramic lighting grows as our in-house ceramicists focus on new designs, finishes and textures.

2021

2017

Mullan Lighting, now with 60 employees, completed a major outdoor decorative lighting project in Dubai. This spurred our R&D and we greatly expanded our outdoor and bathroom fixtures range.

2019

The Mullan Lighting team of experienced designers and craftspeople - many of whom live in the restored mill houses of Mullan Village - continues to grow and develop.

2025

With over 100 skilled team members, Mullan lighting continues to grow. A new expansion is planned with increases to our product ranges and manufacturing capacity.

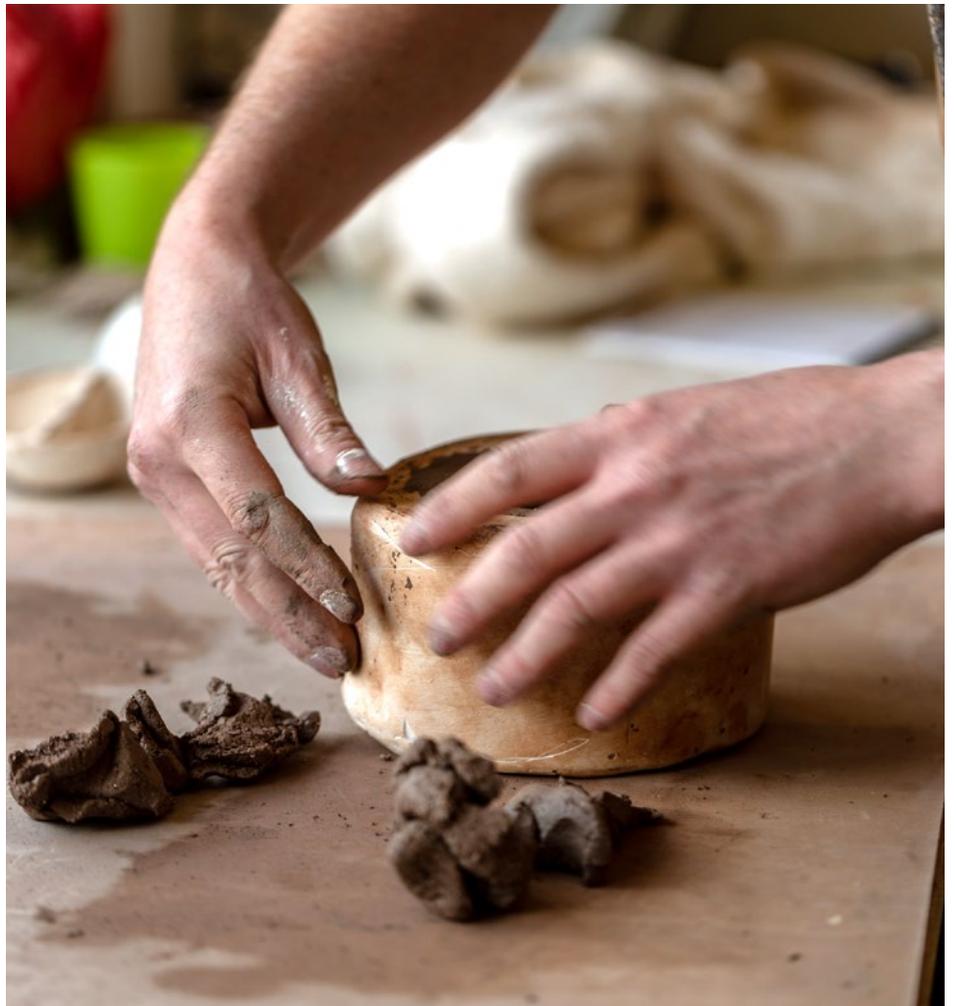

CUSTOMER FIRST

We listen. Our lead times are 2-3 weeks for standard fixtures and 6-8 weeks for bespoke items. Everything is made to order here in our factory in Mullan Village. If it's urgent, let us know — we're here to help, not hinder.

We have no minimum order quantities. Come to us for a single light, or for a thousand - all backed by our five-year guarantee. During business hours, we aim to reply within two hours.

SUSTAINABILITY

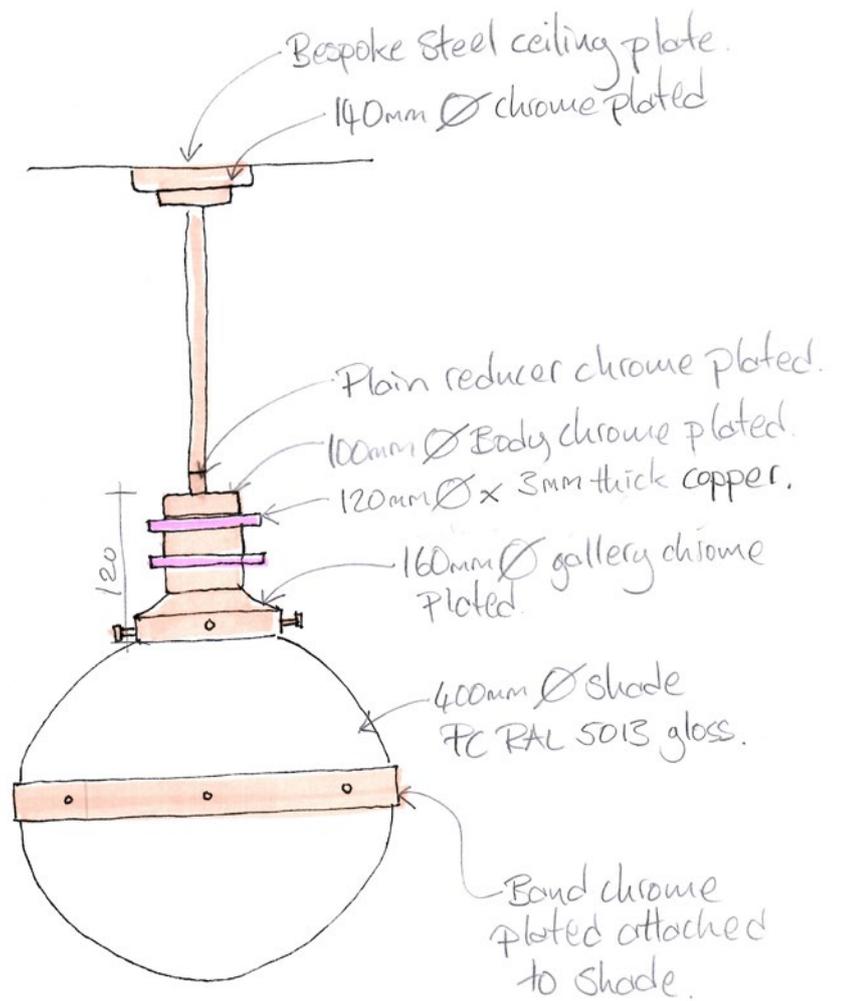

Mullan Lighting is committed to sustainability by reducing energy consumption, minimising waste, managing water and air quality, and promoting the use of sustainable materials. We ensure compliance with Irish and EU regulations, continuously improve our environmental performance, and engage our team and suppliers in our green initiatives.

FROM THOUGHT TO FIXTURE

Our in-house design team has the skills to transform vision into reality. This capability allows us to continually improve, expand, and develop our standard range of fixtures. Tailor-made isn't just an option; it's our specialty. Whether it's indoor, outdoor, bathroom, or living room, we work with you to find the perfect balance between form and function.

We're not limited to lights, either. We've made bar gantries, decorative fretwork panels, trophies, gates and even a foot-bridge. This manufacturing flexibility allows for consistency in finish across an entire project.

CRAFTSMANSHIP

Mullan Lighting continues to champion craftsmanship by manufacturing in-house, ensuring precise quality control. This dedication to local talent and manufacturing resonates with consumers who value authenticity and quality. The village's revival has brought craftspeople back, transforming Mullan into a vibrant community.

WHERE CREATIVITY MEETS METAL

We're the maker. Our factory is in Mullan Village, Ireland, where we do everything from designing this product catalogue to manufacturing our lights.

Our standard lights serve as a canvas for your creativity. Customise any standard fixture to suit your needs by choosing colours, glass types, plug options, pull cord switches, shade shapes, suspension types (solid bar, chain, or cable and catenary wire), and drop heights.

For those who want to go beyond, our bespoke service allows your imagination to run wild. We embrace unique designs and bold ideas, crafting lighting solutions that are truly one-of-a-kind. Whether it's brass, glass, marble, alabaster or timber, we can make it a reality.

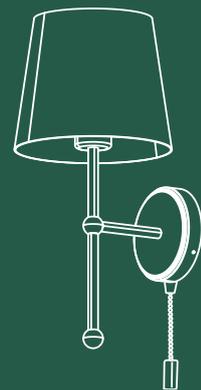

STANDARD

860+ products in our
lighting catalog.

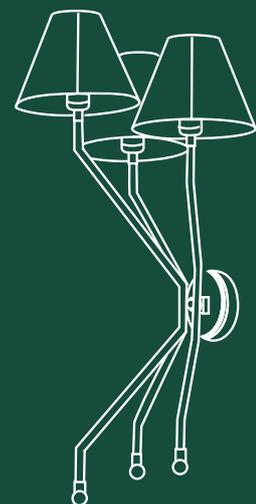

CUSTOMISED

Make standard
items your own.

BESPOKE

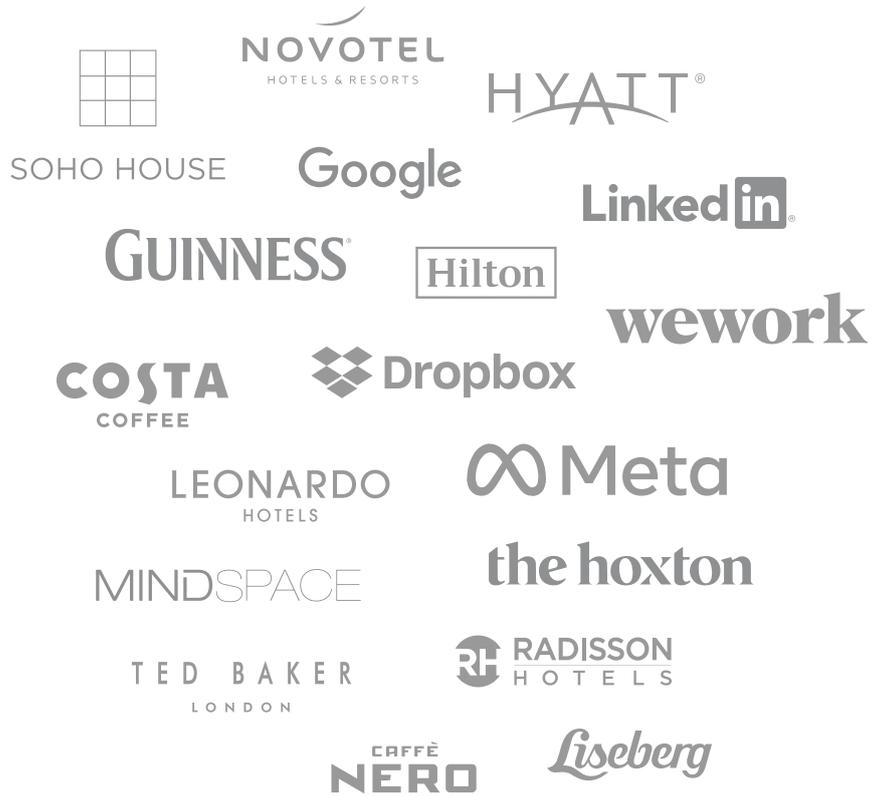

You dream it,
we make it.

BESPOKE PROJECTS

Our bespoke projects range from private residences to collaborations with renowned global brands. Regardless of scope or size, each project is uniquely interesting. We're well equipped to meet the challenge head-on! We take pride in transforming ideas into reality, crafting lighting solutions that are as functional as they are beautiful. The only limit is your imagination.

Our collaborative approach ensures each piece meets and exceeds expectations, providing both functional illumination and aesthetic enhancement. By working closely with our clients, we create lighting designs that truly reflect their vision and style.

SYMBOLS & CERTIFICATIONS

At Mullan Lighting we are proud of the accreditations we have earned to ensure our products are not only manufactured to the highest standards, but are sustainably produced, limiting our impact on the environment around us. Below is a short explanation of some of the symbols and quality assurance marks found on our website and in our catalogue.

UKCA: The UK Conformity Assessment (UKCA) mark is a UK product marking required for products being sold in Great Britain (England, Wales and Scotland). It covers most products that previously required the CE mark.

CE Mark: The CE mark is a mandatory conformity marking for certain products - including light fixtures - sold within the European Economic Area (EEA) and indicates the compliance with EU legislation of a product. It is also found on products that are manufactured in the EEA but sold outside the EEA and is therefore an internationally recognisable symbol of compliance to EU legislation regarding product safety, health, quality and environmental protection. It is similar to the FCC Declaration of Conformity used on certain electronic goods sold in the United States.

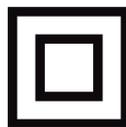

UL Certified: The UL symbol means the product, after a series of testing, meets the UL nationally recognised Standards of Safety. UL is an American non-profit organisation dedicated to public safety and Mullan Lighting is proud to have the majority of its products UL certified.

SASO: The Saudi Standards, Metrology and Quality Organisation (SASO) is a standards and conformity authority in Saudi Arabia. Goods being imported into Saudi Arabia must be accompanied by a Certificate of Conformity (CoC). This certification is available on request.

Class I: A Class I (Class 1) appliance is one that must have its body connected to electrical earth by a separate earth conductor. The earth connection is achieved using a 3-core cable.

Class II: A Class II (Class 2) or double insulated electrical appliance (light fixture) is one which has been designed in such a way that it does NOT require a safety connection to electrical earth (ground). An added layer of safety against electrical shock is achieved by using double layers of insulating material or reinforced insulation protecting any live parts of the fitting.

Waterproof Symbol: This water droplets symbol indicates that the product is moisture-resistant and suitable for use in bathrooms and outdoors. The product has a minimum IP rating of IP44 (most are IP54 or greater), meaning it is protected from water spray from any direction.

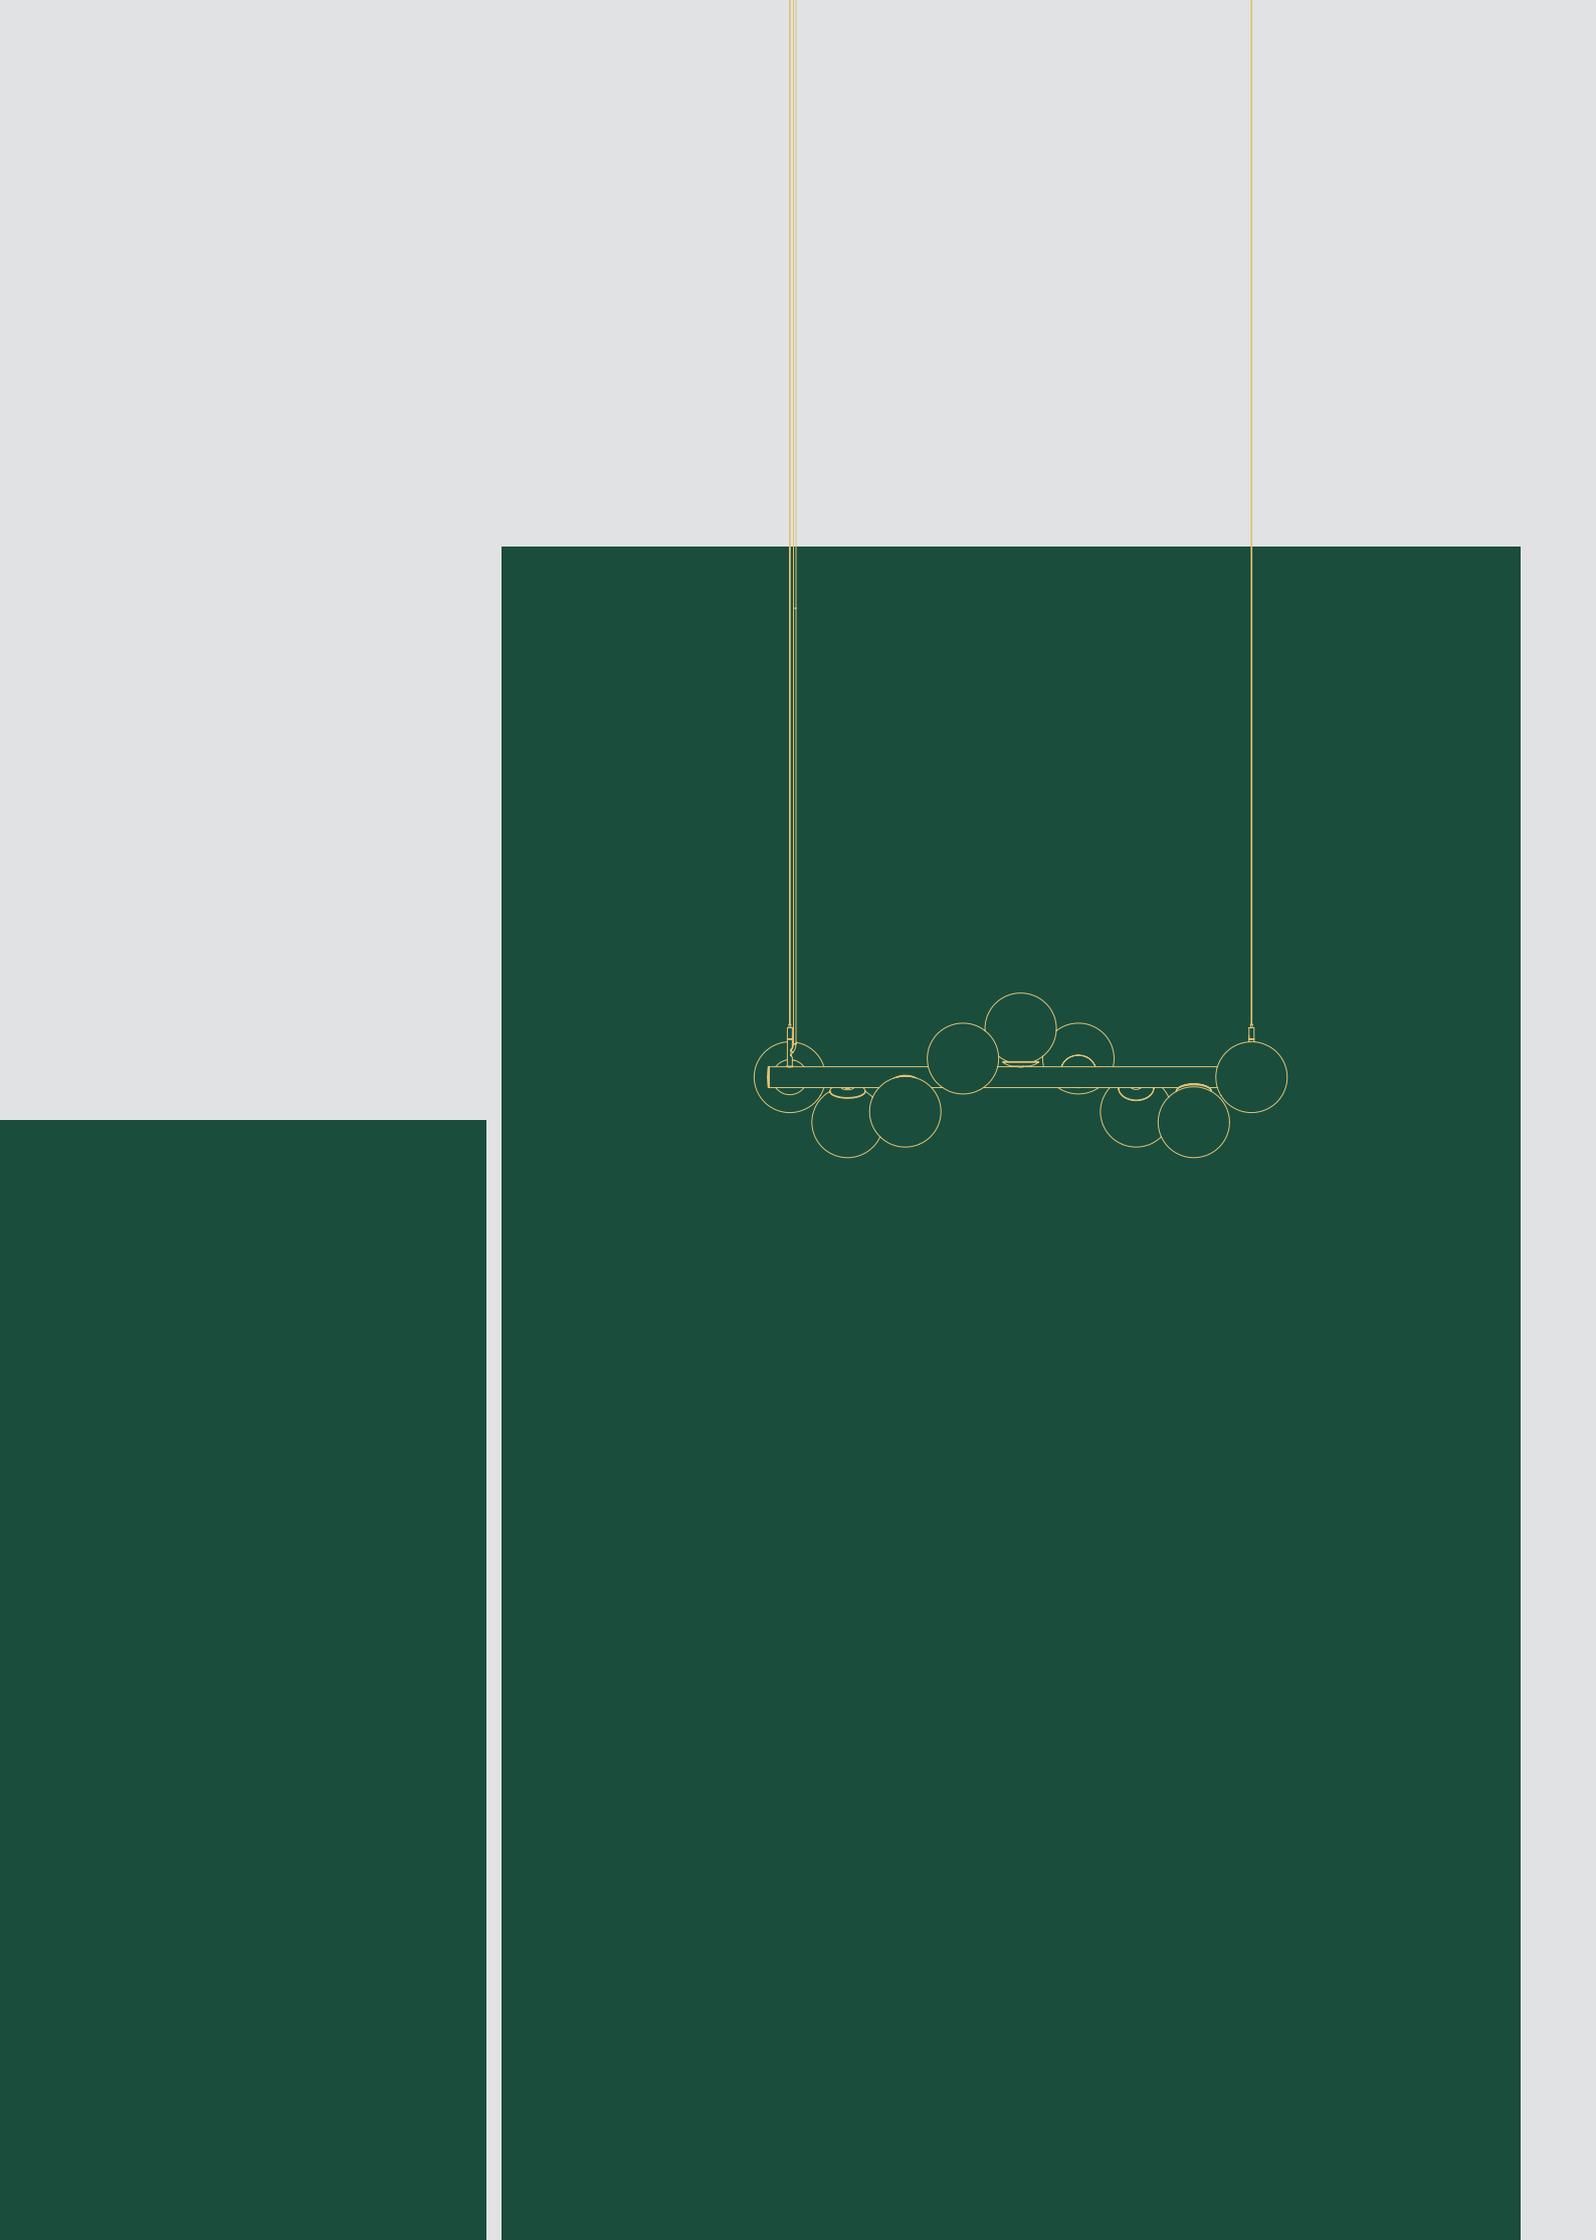

Looking for lighting inspiration?

We love sharing inspiring and interesting projects that feature our lights. We also share casual and educational footage as we manufacture our lights in Mullan Village and hope that this content serves to inspire other makers.

Follow us on social media and be inspired.

Feel free to share images of our products in your home or commercial setting using **#madeinmullan** and **@mullanlighting**.
